SCHSAC 2023: Year at a Glance

The State Community Health Services Advisory Committee (SCHSAC) had a successful year in 2023, characterized by transformation, transition, and growth.

Transformation

SCHSAC represents the voice of Minnesota's community health boards. In 2023, members provided the health commissioner with recommendations and guidance on several statewide health priorities that will help transform and update Minnesota's public health system for the 21st century.

Transition

Reflecting a post-pandemic era, the committee successfully navigated its first full year of hybrid meetings and was supported by dedicated staff from the Minnesota Department of Health. Additionally, over a third of SCHSAC members were new in 2023.

Growth

This year, SCHSAC engaged in several new and reenergized member support activities, including a mentorship program, an online portal, retreats, and more.

SCHSAC's strong history and commitment to collaboration facilitated this year's growth. The committee is well-positioned for continued success and impactful contributions to Minnesota's public health system.

101 Members

SCHSAC consists of voting members and alternates from Minnesota's 51 community health boards. About 35 members and alternates were new this year.

7 Workgroups

Much of SCHSAC's accomplishments begin in workgroups. In 2023, SCHSAC had an Executive Committee and seven workgroups. Two new workgroups formed this year, the Foundational Public Health Responsibilities Funding Workgroup and Performance Measurement Workgroup.

1 Retreat

In addition to four quarterly meetings, SCHSAC held its second annual retreat where members took a deep dive into public health system transformation. The Executive Committee also held a retreat to support its new members.

More member support

Including the Mentorship Program, Member Portal, New Member Orientations, Tech 101 Training, Regional Conversations, and Coffee, Conversation, and Consideration.

About the State Community Health Services Advisory Committee, SCHSAC: SCHSAC (pronounced shak) is a group of county commissioners, city council members, and local public health leaders from all regions of Minnesota. Members meet quarterly with the Commissioner of Health to discuss and give recommendations on public health-related issues that are important locally and statewide. Between quarterly meetings, SCHSAC members in workgroups collaborate to address critical and emerging priorities to help build a stronger public health system statewide.

Message from Chair Tarryl Clark

The creation of an Annual Report is a time to pause and reflect on all that we have accomplished together in the last year. As we continue to work toward recovery from the COVID-19 pandemic and address its impact on the public health system and our public health workforce, we can appreciate our achievements and the spirit of cooperation that made them possible.

Progress can feel slow at times, but the work outlined in this report is testament to the determination, creativity and hard work of the many people who moved us forward in our efforts to strengthen the governmental public health system in Minnesota. This report is a celebration of our collective work and the progress it represents for all Minnesotans.

Thank you to all that were a part of making 2023 such a successful year for SCHSAC and for our public health system in Minnesota.

Summary of activities

Meetings

In 2023, SCHSAC held four meetings on February 24 (virtual), June 22 (hybrid), September 29 (in person), and December 6 (hybrid). Additionally, SCHSAC hosted its second annual retreat on September 28 and 29 in Willmar, MN. Average meeting attendance was 136 individuals representing 43 community health boards.

Meeting take-home notes are available online for up to one year: [Meetings and materials for SCHSAC members - MN Dept. of Health](#). They can also be found in the SCHSAC Member Portal.

Workgroups

In 2023, SCHSAC had an Executive Committee and a total of seven workgroups, including two new workgroups:

- Performance Measurement Workgroup
- Foundational Public Health Responsibility Funding Workgroup

Workgroup charges and activities can be found on page 4.

SCHSAC recommendations approved by the Commissioner of Health

- **Emergency preparedness and response funding formula:** On September 29, 2023, SCHSAC approved a funding formula for the recently appropriated \$8.4 million in state funds for community health boards and Tribes for emergency preparedness and response. The recommended formula included a base of \$75,000 to each community health board to ensure that each has a minimum of 0.5 full time equivalent staff dedicated to emergency preparedness and response. The emergency preparedness response team is moving forward with finalizing the duties and the grants processes.
- **Performance measures and accountability requirement:** On December 6, 2023, SCHSAC approved 2023 performance measures and 2024 performance-related accountability reporting requirement:

- Community health boards self-report on their ability to meet 24 national measures from the Public Health Accreditation Board. These will be reported in March 2024 as part of Local Public Health annual reporting, looking back on calendar year 2023.
- Community health boards will demonstrate their ability to meet the following national measure from the Public Health Accreditation Board: Measure 1.3.3 Use data to recommend and inform public health actions. Community health boards will submit a narrative example in March 2025, looking back on calendar year 2024. The narrative example will be used to assess how well they meet the measure. They will be asked to discuss and report on internal and external factors impacting the ability to use data to recommend and inform public health actions.

More information about the performance measures and accountability requirement can be found online under the workgroup: [Standing and active SCHSAC workgroups - MN Dept. of Health \(state.mn.us\)](#)

- **Foundational public health responsibility funding formula:** On December 6, 2023, SCHSAC approved several recommendations brought forward by the Foundational Public Health Responsibility Funding Workgroup. Included was the funding formula allocating \$9,844,000 of state funding to fulfill foundational public health responsibilities:
 - 59.6% to base funding for all CHB (\$115,000 per community health board)
 - 24.3% according to the social vulnerability of the community health board
 - 16.2% to CHB serving fewer than 100,000 people

More information about the funding can be found online: [Funding for foundational public health responsibilities - MN Dept. of Health](#)

New programming and support

Mentorship Program

SCHSAC launched the Mentorship Program in March 2023 with 11 participants. Two groups met eight times throughout the year. Commissioner Sheila Kiscaden (Olmsted), Ann Stehn (Horizon), and Tammy Fiedler (Wabasha) served as mentors for the groups with assistance from Commissioner Bill Groskreutz (Faribault). Topics included: the value of SCHSAC, what is public health, community health boards and local public health organizational structures, SCHSAC workgroups, community health assessments (CHAs) and community health improvement plans (CHIP), and public health system transformation.

Program evaluation reflected a high level of satisfaction (4.6 out of 5) from the participants. The mentees in particular rated the program very highly for giving them a stronger understanding of public health and SCHSAC.

Coffee, Conversation and Consideration

On November 9, 2023, SCHSAC held the first Coffee, Conversation, and Consideration (CCC), a quarterly discussion series that will continue in 2024. The one-hour virtual program focused on recreational cannabis legalization. Over 50 people participated by sharing their thoughts and

concerns about the law's future implementation. Attendees were a mix of SCHSAC members, alternates, and other local public health leaders from across Minnesota.

SCHSAC Member Portal

A new online Member Portal, hosted on Basecamp, was launched in April 2023. The Member Portal is a repository of meeting materials and other resources. It supplements the resources already available on the Minnesota Department of Health website.

Special events

New Member Orientation

Two New Member Orientation and Member Refresher events were held virtually in 2023 on February 8 and 15. More than 25 people attended the events. The orientation provided an overview of public health and information about SCHSAC, its purpose, and function. Event evaluation reflected a high level of satisfaction from participants with a particular appreciation for the ability to better understand the basic structure of SCHSAC and its role.

The February 8 presentation was recorded and can be found online, along with the slides and transcript by following this link: [Orientation for new SCHSAC members - MN Dept. of Health](#)

Tech 101 Training

SCHSAC held a one-hour virtual training on April 6, 2023, focused on helping anyone affiliated with SCHSAC develop a basic working knowledge of our most-used digital tools and platforms. More than 40 people attended. The training covered WebEx (used for SCHSAC Meetings), Basecamp (used for the Member Portal), and Padlet and Mentimeter (real-time collaborative tools used at meetings). This training was recorded and is posted in the Member Portal.

Regional Conversations

SCHSAC members and alternates, community health services administrators and public health directors were invited to participate in Regional Conversations held virtually on April 27, 2023. More than 40 individuals from 30 community health boards participated. The eight SCHSAC regions were divided into six discussion groups. Each group discussed three questions:

- What are the biggest public health challenges you and your community health board are working to address in the next couple of years?
- What are some of the public health opportunities you and your community health board hope to take advantage of?
- Are there any emerging public health issues that you see coming up in your community?

A summary of common themes can be found in the SCHSAC Member Portal.

Executive Committee Retreat

The charge of the Executive Committee is to be responsible for conducting the interim business and developing recommendations for SCHSAC decisions. The committee provides oversight and

direction for the work of SCHSAC. Executive Committee members began their two-year terms with their election at the February 24, 2023, SCHSAC meeting.

The Executive Committee held a one-day retreat on March 23, 2023 which focused on orienting newly elected Executive Committee members. The agenda included a welcome from Commissioner Cunningham, a health department overview, roles and needs of Executive Committee members, and discussions around public health system transformation, SCHSAC member development, and other SCHSAC business. The Executive Committee also held regularly scheduled meetings throughout the year.

Reports from workgroups

Environmental Health Continuous Improvement Board (EHCIB)

Charge: To fundamentally advance Minnesota’s state-local partnership in environmental health. EHCIB works under the guiding principles of continuous improvement, forward thinking, customer focus, inclusivity, accountability, and partnership.

Activities: EHCIB discussed restarting the mobile food unit workgroup, which was formed in late 2019 and suspended during the COVID-19 pandemic. Plans are in motion to start the workgroup in early 2024. The workgroup will begin working on mobile food unit issues, including licensing and regulatory consistency. Over the summer months of 2023, the EHCIB Workgroup held consensus workshops around three main areas of interest: delegation agreements, groundwater quality, and foundational public health responsibilities. The EHCIB will use the results to identify activities and goals for 2024.

Foundational Public Health Responsibility Funding Workgroup (FPHR)

Charge: To develop for consideration and approval by SCHSAC a set of recommendations to the Commissioner of Health that includes, but is not limited to: (1) a funding formula to determine allocations to community health boards for funding to implement foundational public health responsibilities; (2) a method for incorporating equity into the funding formula; (3) reporting and accountability mechanisms for funding

Activities: The workgroup adopted guiding principles for developing a funding plan that incorporates equity. These principles are: Every community health board should get enough funding to be able to make meaningful progress on foundational public health responsibilities; the funding formula should take into account that not everyone has the same opportunity to be healthy across our state; and the funding formula should help alleviate variation in capacity across our system.

On October 12, 2023, the workgroup voted unanimously to recommend a funding formula that includes a base amount for all community health boards, an additional amount for each community health board based on the level of social vulnerability of the jurisdiction(s), and additional funding for community health boards with less capacity (focusing on small community health boards).

SCHSAC voted to approve these recommendations at their December 6 meeting. The FPHR Workgroup has made additional recommendations for implementation and reporting. The

workgroup's final report can be found online for at least one year under the workgroup: [Standing and active SCHSAC workgroups - MN Dept. of Health \(state.mn.us\)](https://www.state.mn.us/health/schsac/)

Infectious Disease Continuous Improvement Board (IDCIB)

Charge: To ensure an effective and efficient state-local partnership in the infectious disease area of public health responsibility. The group serves as a forum for regular communication, identification of issues, and joint problem-solving. The group also ensures the Disease Prevention and Control Common Activities Framework (DP&C CAF) remains a relevant, useful document.

Activities: IDCIB held five meetings of the full workgroup throughout 2023 and numerous meetings among a sub-group working to rewrite the DP&C CAF document. This document is the foundation for local public health providing disease surveillance, prevention and control resources and services as mandated by Minn. Stat. § 145A (the Local Public Health Act). The process of rewriting this document began in 2018 and was put on hold during the height of the COVID pandemic response. The project was restarted in 2022, and drafting on the document began in 2023. The primary goals of the rewrite project are to (1) more clearly document roles and expectations related to governmental public health infectious disease work such that it reflects the infectious disease work being done by Minnesota Department of Health IDEPC and local public health staff working in infectious disease; and (2) align infectious disease work with the FPHR. A secondary goal is to crosswalk the document with the Public Health Accreditation Board (PHAB) standards and draft information on how the document can be used to support an agency's PHAB accreditation process.

The workgroup is making good progress on a deep dive into infectious disease case investigation done by Minnesota Department of Health and local public health agencies. The workgroup has outlined the general flow and process of case investigations, recommended and drafted metrics to measure the performance of case investigations, and recommended and drafted criteria that a jurisdiction would need to meet to take on case investigation activities.

Member Development Workgroup

Charge: To lead efforts to educate and develop SCHSAC members and assist Minnesota Department of Health staff in conducting member development activities.

Activities: This workgroup reviewed and supported the SCHSAC Mentorship Program and developed and launched the Coffee, Conversation, and Consideration (CCC) program. The inaugural CCC event occurred on November 9, 2023, and focused on cannabis legalization. The workgroup is planning for future quarterly CCC events based on topics of interest to SCHSAC members. The workgroup led icebreaker and networking events at the 2023 SCHSAC Retreat and is creating a member development plan for 2024 related to new member orientation, ongoing member education, and efforts to deepen the connection of members with each other and with the Minnesota Department of Health.

Performance Measurement Workgroup

Charge: To lead efforts to measure and assess the performance of Minnesota's governmental public health system and its capacity to carry out public health responsibilities. This includes but is not limited to: (1) developing and recommending to SCHSAC a set of performance measures

for Minnesota’s governmental public health system; (2) setting and monitoring performance-related goals for Minnesota’s governmental public health system; and (3) analyzing data to assess the performance of Minnesota’s governmental public health system.

Activities: In 2023, the workgroup focused on the statutory obligations of community health boards related to performance and accountability.

The workgroup recommended performance measures for 2023: Community health boards will self-report on their ability to meet 24 national measures from Public Health Accreditation Board (PHAB) in March 2024 as part of local public health annual reporting. These measures represent a restart to reporting on performance measures, which were paused amid the COVID-19 pandemic. These measures were selected because they (1) build on the cost and capacity baseline, (2) align with the national framework, (3) represent best practices to guide public health work, (4) reflect foundational knowledge, skills, and abilities, and (5) provide continuity and tracking.

The workgroup also made a recommendation for the 2024 performance-related accountability requirement: Community health boards will demonstrate their ability to meet the following national measure from PHAB: Measure 1.3.3: Use data to recommend and inform public health actions.

Community health boards will submit a narrative example in March 2025, looking back on calendar year 2024. The narrative example will be used to assess how well they meet the measure. They will be asked to discuss and report on internal and external factors impacting the ability to use data to recommend and inform public health actions.

This measure related to the use of data was selected for many reasons, including (1) the importance of data in public health work, (2) the need and opportunity for improvement, (3) the opportunity for deeper learning to support public health system transformation efforts.

These recommendations were approved at the December 6, 2023, SCHSAC meeting. The workgroup’s final report can be found online for at least one year under the workgroup: [Standing and active SCHSAC workgroups – MN Dept. of Health \(state.mn.us\)](https://www.health.state.mn.us/schsac/workgroups/standing-active)

Public Health Emergency Preparedness (PHEP) Oversight Workgroup

Charge: To advise on strategic planning for local and tribal health preparedness activities of public health emergency preparedness in Minnesota. To provide ongoing review of local and tribal public health emergency preparedness programs and issues. To oversee the continued development of capacity assessment and related measurement outcomes for Minnesota's local and tribal public health emergency preparedness programs. And to advocate for resources that sustain and maintain local and tribal public health emergency preparedness capabilities.

Activities: The PHEP Oversight Workgroup recommended a funding formula for the \$8.4 million state legislative public health emergency preparedness and response funding. The formula was approved by SCHSAC on September 29, 2023. The workgroup adopted the following principles for the funding: strengthen capacity across the state, each community health board should have a minimum of .5 full time equivalents dedicated to emergency preparedness and response, grant duties aligned with national standards and emergency preparedness and response capabilities, and multi-county community health boards should ensure that all

counties have access to staff dedicated to emergency preparedness and response. Goals for this funding include incorporating flexibility in grant duties and reporting to demonstrate progress to the legislators. Work is continuing to explore goals, roles, and expectations for local public health and the Minnesota Department of Health related to the National Public Health Foundation Emergency Preparedness and Response Capabilities.

Three Simple Rules of the State-Local Public Health Partnership

- I. Seek First to Understand*
- II. Make Expectations Explicit*
- III. Think About the Part and the Whole*

- Katie Triebold, MDH Emergency Preparedness and Response Division

SCHSAC representation to other advisory committees

Healthy Minnesota Partnership

The Healthy Minnesota Partnership brings community partners and Minnesota Department of Health together to improve the health and quality of life for individuals, families, and communities in Minnesota. SCHSAC appointed Mai Chong Xiong (St. Paul-Ramsey) to serve as Representative and Jenna Carter (Bloomington) to serve as Alternate to the Healthy Minnesota Partnership.
