## **In Appreciation**

We are indebted to the students, parents, teachers, Minnesota Student Survey coordinators, principals and superintendents across the state that agreed to participate in and supported the student survey when it was administered in the first half of 2016. These data are made available as a result of their interest and time, and we are grateful for their efforts.

We are also indebted to the many state agency staff, especially the analysts with the Minnesota Center for Health Statistics at the Minnesota Department of Health, for their tireless work on making these data available.

## **2016 MINNESOTA STUDENT SURVEY**

### **Survey Participation**

The 2016 Minnesota Student Survey (MSS) was administered in the first half of 2016 to students in grades 5, 8, 9, and 11 statewide. Of the 330 public operating districts, 282 agreed to participate (84% of public operating school districts).

Public school student participation was voluntary and surveys were anonymous. Across the state, approximately 66% of fifth graders, 73% of eighth graders, 71% of ninth graders, and 61% of eleventh graders participated in the 2016 Minnesota Student Survey. Overall participation across the four grades was approximately 68% of total enrollment.

All schools and districts that participated in the survey followed federal laws regarding parental notification as required by the Protection of Pupil Rights Amendment (PPRA). PPRA requires that schools that participate in the survey notify parents of the survey administration, provide parents the opportunity to review the survey instrument, and allow parents to opt their child out of participating.

### **Mode of Administration**

In 2016, all students in grades 5 and 8 completed the survey online. Schools with grade 9 and/or grade 11 students could choose to administer the survey online or with the traditional paper survey. Methods could not be mixed within a single school. The survey questions online were the same as those in the paper survey booklets.

### **Items on the Tables**

The accompanying set of tables includes the responses for all survey items. Items are ordered within the tables according to meaningful domains; the order items appear on the tables is not necessarily the order they appeared in the survey. A table of contents is provided on pages v-vi. The grade 5 survey version was shorter than the grade 8 survey version, which in turn was shorter than the grade 9/11 version. The grade 5 and grade 8 versions did not include items appropriate only for older students. Items found on some versions of the survey but not on others are identified on the tables.

## **New Questions and Year-to-Year Comparisons**

Some of the 2016 survey instrument questions were changed from the 2013 survey instrument. While most questions stayed the same, other questions were updated with changes to the question or response options. Some entirely new questions were added, and some questions were dropped. New questions are noted on each table. Caution must be used when making comparisons over time for any questions in which the wording has changed.

Please note that although these surveys are given repeatedly over time, student populations may change between administrations of the survey.

## **Validity of Responses**

Caution was taken to identify invalid responses and remove them from the analysis. Surveys were eliminated when responses were highly inconsistent or there was a pattern of likely exaggeration. The exact percentage of surveys removed will be available in September 2016.

	Obese			14%	11%	13%	10%	15%	8%

\* 5th grade survey did not ask this question.

\*\* Body Mass Index (BMI) is a number calculated from a child's self-reported weight and height. BMI is calculated using a standard formula. BMI-for-age percentiles are used to interpret BMI numbers for children and teens. CDC BMI-for-age growth charts were used to determine weight status according to BMI for participants in the Minnesota Student Survey.

Not overweight: Less than the 85th percentile

Overweight: 85th to less than the 95th percentile

Obese: Equal to or greater than the 95th percentile

2016 Minnesota Student Survey
