The WINNIE Application/Software

WINNIE is not considered a "new" system since the database is the same and the internal code is simply being rewritten. However, the very nature of making the system browser-based will cause it to look and feel very different to users.

Therefore, going forward we will take a look at some of the screens in WINNIE and some exciting new changes that will be coming. Instead of providing print screens this month, we have posted a "module" online that will provide a second look at Adjust Benefits, which is the Food Adjustment Wizard function in WINNIE. This time, we'll see how WINNIE adjusts foods that have already been redeemed as well as take a look at the functionality behind the Update Future Months button.

Adjust Benefits Overview

[Adjust Benefits Overview #2 Module \(HTML5/16 minutes\)](#)

[Adjust Benefits Overview #2 Script \(PDF\)](#)

NOTE! If the audio doesn't play when the module is first opened, please click the Pause button followed by the Play button.

Future Newsletters

Next month, we will take a look at another Adjust Benefits scenario in which a mostly-breastfed infant is issued more formula and the CVB is added to their food prescription when not originally issued.
